FACT SHEET

In our 30 years in business, our firm has handled over 200,000 transactions covering commodities ranging from aircraft to zippers. Our more than 300 customers include a few Fortune 500 firms, many medium size firms, and several sole proprietors. We cater especially to those importers who have complicated imports, special needs, and/or require premium service.

We began operations in 1986, and we have grown to a staff of twelve including four licensed brokers, all of whom are also Certified Customs Specialists. We have had a formal quality program for over 25 years, which has been instrumental in making us one of the top brokers in the United States. Our low error rate with Customs is especially noteworthy since our small firm has handled thousands of anti-dumping, FDA, EPA, ATF, and other difficult entries. In 2003, we formalized our security program and proudly became a Customs and Trade Partner Against Terrorism (C-TPAT) participant. Our C-TPAT processes were validated by Customs in 2006, 2010, and again in 2015.

Our firm is also a leader in using computers to speed releases through Customs. We were one of the very first in Atlanta to be approved by Customs to go on line with their central computer, known as ABI. We are nationally permitted and can clear cargo electronically at all U.S. ports under national entry processing. Notably, we have full EDI capability.

In an effort to expand our services to our customers, we became a founding member of Global Freight Group. GFG is a worldwide association of forwarders, customs brokers, and international transporters in 200 cities in more than 55 countries. We have access to a number of ocean and air freight contracts and other services for all your import, export, transportation (both domestic and international) and warehousing needs. We are proud to be member of this logistics network and pleased to offer reliable transportation services worldwide.
