

US Representative for Foreign Companies

We currently represent a number of companies not located in the United States, but have import shipments to customers located here. We act on their behalf to arrange Customs clearance and delivery anywhere in the US.

Through our partnership with Team Logistics, we offer total supply chain management including warehousing, container stripping and re-shipping, order fulfillment, inventory control, repackaging, and light assembly. We also act as agent for “service of process” for Customs and legal purposes. If you are interested in this service, please click on the ”Contact Us” icon on our home page.
